

# COOL LASERS OPEN CLOGGED ARTERIES

---

## AT VBMC-BROWNSVILLE.

Opening clogged arteries with laser therapy restores blood flow, helping to relieve symptoms as well as circulation problems.

---

## SAFE AND EFFECTIVE BREAK THROUGH LASER THERAPY

- The latest development in laser therapy is now available at Valley Baptist Medical Center-Brownsville.
  - It's the excimer laser, a "cool" ultraviolet laser that "vaporizes" and removes artery plaque rather than merely pushing it aside.
  - The laser angioplasty system is very effective at removing arterial buildup in the legs.
  - In fact, it is estimated that over 150,000 limb amputations in the U.S. every year could be avoided by using this and other devices available at Valley Baptist Medical Center-Brownsville.
- 

For the most advanced cardiac and vascular therapies, look to Valley Baptist Medical Center-Brownsville. **Caring for our community like nowhere else.**
