

ICD-10 DOCUMENTATION TEMPLATE

When you have completed your evaluation of the patient and identified what is wrong with them, write this type of summary statement.

This is a (age) (gender) patient seen for an (initial, follow-up) visit with (acute, chronic, acute on chronic) (diagnosis - use lots of adjectives) of the (right or left) (specify exact anatomical location) due to (organism, underlying disease process, activity - including location at the time and circumstances) causing symptoms of (manifestations). Associated conditions and comorbidities (if you are treating it at all, including medications – document the diagnosis).

**During the work-up it's okay to document "probable, likely, rule out, etc. but these terms should not be used in your final summary statement.*

PACS

P

Principal Diagnosis

- Cause for admission, after workup
- Working diagnosis or confirmed

A

Acuity

- Acute, Acute on Chronic, Chronic
- Initial or subsequent episode of care

C

Causality

- Established or “working” causality
- Link diagnosis to causality explicitly

S

Stage

- Stage, grade, criteria, or analogous classification
